Dear Worker… Dear Employer,

Many cleaning products contain toxic or harmful chemicals. Please stay safe and follow these essential precautions when handling them:

Use Natural Alternatives

Prefer natural alternatives to chemical detergents, as they are considered safer.

Avoid Mixing Products

Never mix different detergents or cleaning products, even in small quantities.

Store Safely

Keep chemical detergents clearly labeled in a safe and isolated area. Ensure an information or safety data sheet is available at the storage site for each product.

Ensure Proper Ventilation

Always make sure the area is well-ventilated before, during, and after cleaning.

Dilute When Needed

Dilute cleaning products with water according to instructions to reduce their hazards, and always seal containers tightly after use.

Wear Protective Equipment

Use gloves, masks, and any necessary protective equipment to prevent harm to your skin, eyes, and lungs.
